SPOTLIGHT: SIGHTHOUNDS ARE DIFFERENT

Originally written by the late Leo Steenbergen, *Sighthounds are different* is a comprehensive guide to how sighthounds are physiologically different from other dog breeds.

Includes topics such as:

- Differences in red and white blood cell levels, antibody levels and thyroid levels.
- How blood tests can be interpreted incorrectly when compared to other breeds
- How the heart differs to other breeds
- Anesthesia and medication differences
- How sighthounds can react differently to antibiotics

This book can be an asset to all owners and veterinarians when making a a correct diagnosis for a sighthounds.
